

SIPSAW – School Improvement Plan for Student Achievement and Wellness Numeracy

Goal: Throughout the year, we would like to continue to move our focus students along the addition/subtraction continuum and multiplication/division continuum using a variety of strategies.

Plan:

- *We will focus on using the What to Look For continuum and continually assess students based on the strategies they are using*
- *We will use Learning Goals and co-create success criteria with students*
- *We will name the math and have a strategy wall in the classrooms*
- *We will include intentional instructional moves in our interventions for students who are in the early stages of the continuum (focus on Math games to build efficacy)*
- *We will have guided math groups to provide students with additional support/practice*
- *We will differentiate how we collect data to assess student learning*

Reflection/ Year in Review:
